

## The starting point

Asif's school was threatened with closure

Standards and expectations were far too low

Asif's parent/carers weren't interested in his school or his learning

A federation was formed with another challenging school

But.....that didn't automatically make things better

## The living vision is to.....

Create an identity in an alien environment

Develop leadership confidence, competence and capacity

Raise expectations of what is possible

Raise standards in every respect

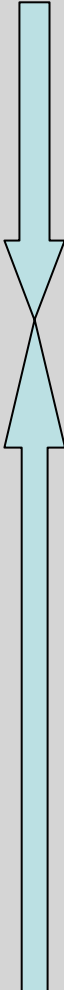

Engage parents and communities

Develop the concept of through schooling

Develop long term solutions to local & national barriers to change

Improve Asif's life chances

## The journey so far.....

Sharing the vision against the grain  
Battling with the impediments in the local context  
Delivering collaboration with non-collaborators  
Keeping the focus whilst influencing the context  
A hard won 3-19, federated identity challenging the status quo  
Commonality across schools  
A through school ethos  
Distributed leadership rising to the challenge  
A more dynamic & federated curriculum  
Changed attitudes toward inclusive, personalised learning  
Rising expectations  
Governors seeking their own solutions

## The future.....

Expanding the Federation into.....?

Leading change in the local context  
through schooling  
new locality arrangements

Influencing understanding & change in the national context

Parents & carers engaged with their schools and learning

Fully collaborative leadership with very high expectations

More innovation where it works

Much higher standards

Improved outcomes within 12 months

Improved life chances for Asif
